

**Reach For
Tomorrow
also provides**

**Motivational Summer
Experience**

A number of students in each program will earn the opportunity to spend a week during the summer at a college campus at no charge. Students will be exposed to science and engineering labs and hands-on activities where they learn about what it takes to prepare for successful careers as they complete their middle school years.

Curriculum Coordinator

Each program is assigned a Curriculum Coordinator to train teachers in the use of the program, to assist in the setup of the program, and to be available to answer any questions

Extralearning Online

Extralearning Online

Is an online, individualized, self-paced, K-12, scientifically, research based Mastery Learning program.

Which enables educators to:

Identify the functioning level of students in all subject areas and create an Individual Program of Study (IPOS) to address the needs of each student.

Individualized Programs of Study (IPOS)

- Allow students who are falling behind to catch up quickly by filling the gaps in their education and focusing specifically on what they do not know, rather than using valuable time to relearn information they already know.
- Allow accelerated students to work quickly through the curriculum at their own pace, eliminating boredom and frustration.

The program delivers Instruction through an Educational Continuum in:

- Reading
- Writing
- Math
- Science
- Social Studies/Social Science
- Life Skills

State Standards and Current Legislation

Extralearning Online is aligned to all state standards, can be customized to meet district standards, and meets the needs of No Child Left Behind legislation.

Extralearning Online offers a comprehensive content

- K-12 Academics
- Adult Education
- Career Preparation
- Computer Training
- Life & SCANS Skills

Content is delivered using a variety of materials to address different learning styles

- Books
- Assessments and Tests
- Internet Sites
- Skill Modules
- Streaming Videos

The flexibility of the program allows teachers to add

- Projects
- Book Reports
- Small Group Activities
- Science Experiments
- And more

Features of the Program

- Access 24 hours a day
- Online tutor assistance seven days a week
- Over 50 academic courses
- Over 25 Life Skills courses
- Over 1,700 Books
- Over 5,000 Internet Sites
- Over 20,000 Streaming Videos
- Management Component

Types of programs currently using Extralearning Online

- After School
- Summer School
- Dropout Prevention
- Alternative Schools
- Supplemental Education
- Home School Outreach
